PROFILE

Dedicated and innovative front-end developer specializing in React.js. With a strong foundation in creating responsive, user-friendly web applications, I bring a blend of technical expertise and creative problem-solving to every project. My experience includes customizing complex components, implementing efficient state management solutions, and ensuring seamless user experiences across different devices.

EDUCATION

Business and Information Systems

2018 – 2022

Helwan University

GPA:3.25 | Graduation Project Team Leader

PROFESSIONAL EXPERIENCE

Front end developer

09/2022 – 03/2025

Gemini Media

Cairo, Egypt

- Developed and maintained dynamic applications using React.js and React Native, enhancing user experience and application performance across both web and mobile platforms.

PROJECTS

Menu Translation Web App (MenusLingo) 🔗

Present

Freelance Full-Stack Developer

- Built a SaaS web application that **extracts, translates, and generates multilingual restaurant menus** from uploaded images and PDFs.
- Implemented **OCR using Google Cloud Document AI** to accurately extract Japanese menu text.
- Integrated **AI-powered translation (Vertex AI / Gemini)** to produce natural English and Chinese menu translations.
- Designed a **job-based processing system** for OCR, translation, and PDF generation with real-time progress tracking.
- Developed **custom PDF generation** with multiple styles (basic, modern) and downloadable, signed URLs.
- Implemented **payment flow with Stripe**, unlocking premium features after successful checkout.
- Built a **secure backend** using Node.js, Express, and TypeScript with role-based access and signed downloads.
- Deployed frontend and backend using **Vercel, Render, and AWS S3**, handling environment-based configs and production scaling.

Tech Stack: React, TypeScript, Node.js, Express, Google Cloud Document AI, Vertex AI (Gemini), AWS S3, Stripe, PDFKit, Vercel, Render

Gemini Media HR System

Technologies Used: React, Redux

Developed a comprehensive Gemini Media HR system that allows each user within the company to:

- View their own attendance and KPI.
- Managers can view team attendance and generate attendance reports.
- HR personnel can add new members, update attendance records, create KPIs, and perform other HR functions.

Masrawy Mobile App

Technologies Used: React Native, Redux Toolkit, React Navigation

Created a mobile news portal application that delivers up-to-date news content. The app is designed to provide a seamless user experience on mobile devices, ensuring easy access to news articles and updates through Firebase notifications

Green Me Web Application

Technologies Used: React, Redux Toolkit Query, Ag-grid, Tailwind

Built a website dedicated to renewable energy solutions, featuring:

- Detailed information about various renewable energy solutions.
- User-friendly interface with efficient state management for a seamless browsing experience.
- Dynamic content fetching and display using Redux Toolkit Query.

Medical Representative App

Local first mobile app with React native and SQLite

Developed a React Native app using Expo SQLite, focused on providing local-first functionality for offline CRUD operations. Designed for medical representatives, the app enables users to initiate a client visit when they are within 20 meters of the client's location and much more. It supports all critical operations offline, ensuring seamless workflow and data management even without an active internet connection.

Masrawy & Yalla Kora

Maintained and enhanced two of the largest news websites in the Middle East

Masrawy [↗](#) : A general news portal providing timely news updates and articles.

Yalla Kora [↗](#) : A sports news website focusing on the latest sports news and updates, especially football (soccer).

Key contributions include:

- **Ad Management:** Created and maintained ad templates for both websites, ensuring dynamic and effective ad placements.
- **Feature Enhancements:** Implemented new features and optimized existing functionalities to improve user experience.
- **Content Updates:** Ensured that the websites remain current with the latest news content and ads.

MEI Website [↗](#)

Technologies Used: Next.js

Developed a website that showcases a list of restaurants under the MEI group, categorized by cuisine type. Key features include:

- Easy navigation through different restaurant categories.
- Integration with Swiper.js for smooth and responsive carousels.
- Server-side rendering with Next.js for improved performance and SEO.

SKILLS

TypeScript | **JavaScript** | **React js:** hooks, context, functional components, routing |
React Native | **Redux:** redux toolkit, redux query | **Next Js** | **SQLite** | **Tailwind** | **HTML / CSS** |
Sass | **Node Js** | **PHP** | **Testing:** Unit testing, End to end testing with Jest | **Restful APIs** |
Git and GitHub | **UI design Tools:** Figma | **Agile Development:** scrum | **SEO Optimization** |
Error Reporting with Sentry | **Deploying Services to Google Cloud** |
Web Performance and accessibility

LANGUAGES

English • **Japanese** (JPT N2 | JLPT N3) • **Arabic**

ADDITIONAL EXPERINCE

Relocation Assistant (Part-time)

WA Company

2025
Tokyo, Japan

- Developed strong professional discipline and teamwork skills within a Japanese corporate environment.
- Consistently met high standards for punctuality and physical task management.
